Caswell EZIO SOP

㈜보이저아이엔씨

버전:20181010-R00

작성자: 보이저아이엔씨 R&D팀

1.	테스트 환경	3
2.	EZIO API 컴파일	3
3.	EZIO API 사용	3
	3.1 EZIO-300 / EZIO-310 / EZIO-350 / EZIO-360 API 사용	5

1. 테스트 환경

System	COS-D304		
BIOS	CASwell, Inc. CAPB-6000NR-5100-002 BIOS Rev.R2.01 (05232018)		
OS	Ubuntu 16.04		
EZIO API	caswell_util_ezio-V1.11.1.zip		

2. EZIO API 컴파일

STEP1: EZIO API 압축을 풀다.

```
root@ubuntu160403:/home/caswell_driver# ls
caswell util ezio-V1.6.0.zip
root@ubuntu160403:/home/caswell_driver# mkdir ezio160
io160/buntu160403:/home/caswell_driver# unzip caswell_util_ezio-V1.6.0.zip -d ez
Archive: caswell util ezio-V1.6.0.zip
4acd34b4604397891923659afad765a2d34669b6
 inflating: ezio160/Makefile
 inflating: ezio160/README
  creating: ezio160/include/
 inflating: ezio160/include/ezio 300.h
 inflating: ezio160/include/ezio_340.h
 inflating: ezio160/include/ezio_g500.h
 inflating: ezio160/include/lcd_ctrl.h
  creating: ezio160/src/
 inflating: ezio160/src/ezio_300.c
 inflating: ezio160/src/ezio_340.c
 inflating: ezio160/src/ezio_g500.c
 inflating: ezio160/src/lcd ctrl.c
  creating: ezio160/src/sample/
  creating: ezio160/src/sample/lcdd/
 inflating: ezio160/src/sample/lcdd/Makefile
 inflating: ezio160/src/sample/lcdd/Makefile.in
 inflating: ezio160/src/sample/lcdd/configure
 inflating: ezio160/src/sample/lcdd/configure.ac
  creating: ezio160/src/sample/lcdd/main/
 inflating: ezio160/src/sample/lcdd/main/lcdd.c
 inflating: ezio160/CHANGELOG
```

STEP2: EZIO API 컴파일.

```
root@ubuntu160403:/home/caswell_driver/ezio160# ls
CHANGELOG include Makefile README src
root@ubuntu160403:/home/caswell_driver/ezio160# make
gcc -DEZIO_300_CONFIG -Os -s -I ./ -L ./ /home/caswell_driver/ezio160/src/ezio_300.c /home/caswell_driver/ezi
o160/src/lcd_ctrl.c -o /home/caswell_driver/ezio160/bin/ezio_300_api
```

3. EZIO API 사용

컴파일 후 생성된 API가 ../bin/폴더에 있습니다.

root@ubuntu160403:/home/caswell_driver/ezio160/bin# ls ezio_300_api ezio_320_api ezio_340_api ezio_360_api ezio_g400_api ezio_310_api ezio_330_api ezio_350_api ezio_g300_api ezio_g500_api root@ubuntu160403:/home/caswell driver/ezio160/bin#

아래 기준 Caswell 장비에 쓴 EZIO API list 첨고.

System	EZIO모델명	EZIO API	Source Code
VAR-1916L	EZIO-300	/bin/ezio_300_api	/src/ezio_300.c
CAR-2070	EZIO-310	/bin/ezio_310_api	/src/ezio_300.c
COS-3402	EZIO-310	/bin/ezio_310_api	/src/ezio_300.c
COS-D304	EZIO-360	/bin/ezio_360_api	/src/ezio_300.c
COS-D305	EZIO-360	/bin/ezio_360_api	/src/ezio_300.c
CAR-5040	EZIO-350	/bin/ezio_350_api	/src/ezio_300.c

아래 EZIO 모델들이 쓴 API명령어 똑같습니다.

- EZIO-300 / EZIO-310 / EZIO-350 / EZIO-360

3.1 EZIO-300 / EZIO-310 / EZIO-350 / EZIO-360 API 사용

a. API HELP message

```
root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api
./ezio 360 api - The Caswell EZIO sample API
Usage: ./ezio_360_api -d [device] -[command]
[device]
        example: /dev/ttyS0
[command]
                               Read key
         -g
         -s [Line] [Message]
                               Display message
           [Char] [Row] [Col] Display a character in specific position
         -C
                               Clear screen
         -C
                               Home cursor
         -0
         -L
                               Move cursor 1 character left
                               Move cursor 1 character right
         -R
         -1
                               Scroll 1 character left
         -r
                               Scroll 1 character right
                               Hide cursor & display blanked characters
         -i
                               Turn on (blinking block cursor)
         -t
         -S
                               Show underline cursor
                               Send noise message
         -n
         -h
                               Show help message
         -p [Information]
                              Create customized pattern
         -P [Addr] [Row] [Col] Display customized pattern in specific position
                    (1|2) Display in the (1|2) lines
         [Line]:
         [Row]:
                    (1|2)
                    (1|16)
         [Col]:
         [Message]: display string, string length limit of 16
         [Information]: get save address and row types,
                        need 18 characters, more in README
```

b. 한 라인으로 문자 표시

- 명령어 : ./ezio 360 api -d /dev/ttyS1 -s [Line] [Message]

예시 #1)

```
root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -s 1 VoyagerInc
root@ubuntu160403:/home/caswell_driver/ezio160/bin# _
```

실제 화면:

예시_#2)

root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -s 1 VoyagerInc root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -s 2 Songdo root@ubuntu160403:/home/caswell_driver/ezio160/bin# _

실제 화면:

c. 지정된 위치에서 문자 표시

- 명령어 : ./ezio_360_api -d /dev/ttyS1 -C [문자] [Row] [Col]

예시)

```
root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -C A 1 2 root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -C b 2 1 root@ubuntu160403:/home/caswell_driver/ezio160/bin#
```

실제 화면:

d. 화면 지우기

- 명령어 : ./ezio_360_api -d /dev/ttyS1 -c

예시)

```
root@ubuntu160403:/home/caswell_driver/ezio160/bin# ./ezio_360_api -d /dev/ttyS1 -c
root@ubuntu160403:/home/caswell_driver/ezio160/bin# _
```
